

# The Global Star™ Fuel Dispenser: Style meets substance.

All petrol pumps dispense fuel, but only one helps you maximize fuel sales while minimizing the total cost of ownership. With capabilities to be a true revenue source, Dresser Wayne's Global Star is a sound investment for years to come.

Designed to help maximize fuel sales while minimizing ownership costs, Dresser Wayne's Global Star is the preferred choice of fuel retailers across Europe. Its sleek ergonomic shape is both attractive and practical and thanks to its compact size and wide range of configurations, the Global Star is ideally suited to become the centerpiece of any forecourt.

## Tailored to your forecourt needs

Offering an endless range of different configurations, Global Star is Dresser Wayne's most flexible pump. Available as C-style, as well as H-style, Global Star features 4 different hose arrangements with varying hose-reaches. Additionally, a broad variety of options and applications for flow-rates ranging from 40-130 liters per minute contribute to make Global Star the optimal choice to fit any specific retail fuelling needs.

Responding to the growing demand for environmentally friendly fuel alternatives becomes easy with the possibility to offer up to 5 separate fuel grades per dispenser. Alternative fuels like E85, LPG, AdBlue®, BioDiesel and CNG are all supported by the Global Star product line, offering an unmatched forecourt freedom in a single model range.

## Save fuel, save time, save money

Without accurately-calibrated dispensers, you could be unintentionally giving away fuel every time customers fill their tanks. The new Dresser Wayne Xflo™ Meter can make this a thing of the past. With fewer moving parts and additional calibration points, the Xflo Meter sets the standard in metering accuracy. It's not only accurate, it's also 20-30% faster than traditional piston meters. And faster, more accurate transactions mean more profit to your bottom line.

## So accurate, you may never have to calibrate it again

With the Xflo Meter, expect more accurate metering and less frequent calibration. In both lab and field tests, the Xflo Meter demonstrated no discernible drift after metering millions of liters of fuel — all were still perfectly calibrated. That means potential fuel savings of thousands of liters per year.

- Corrosion resistant, high-finish exterior looks good for years.
- Patented, durable fiber glass enforced polyamide nozzle boot protects nozzle spout from wear and tear stains.
- Easily maintained and upgradeable components.
- Dresser Wayne Genuine Parts mean maximum performance and lower service costs.

- Xflo Meter - more accurate metering and fewer calibration service calls
- Award-winning iX Technology Platform helps increase sales and maximize uptime.
- iSense self-diagnostics software troubleshoots equipment problems before they strike.
- iXPay leveraging the flexibility of the iX Technology Platform, the pay at the pump module seamlessly integrates country-specific and customer-defined payment schemes including PCI security requirements as well as EMV and non-EMV payment scenarios.
- iX Media's customizable video promotions and coupon capability helps drive high-margin sales.

## iX Technology Platform

Dresser Wayne's award-winning iX Technology Platform can help fuel retailers dramatically lower ownership costs, reduce unexpected downtime, and increase sales and productivity. The scalable, open-architecture platform currently supports three product extensions designed to benefit fuel consumers and fuel retailers:

- **iSense™** self-diagnostics software automatically diagnoses and troubleshoots potential site equipment problems even before they occur. It also allows real time monitoring of tank levels and flow rates from anywhere in the world.
- **iXPay** the in-dispenser payment terminal takes ergonomics and ease of use to the next level.

The user-friendly interface is based on an ATM-style display with soft keys. Leveraging the flexibility of the iX Technology Platform, the module seamlessly integrates country-specific and customer-defined payment schemes including PCI security requirements as well as EMV and non-EMV payment scenarios. Additionally, it supports third party PIN pads, card readers and security modules as specified by European requirements giving you a complete security solution that adheres to your country's regulations.

Security Features:

- Use of Tamper-Responsive Security Modules
- Built-In Keypad Privacy Shields
- Supports Multiple Display Configurations
- Protected Data Links Between Components
- Protected Mag-Stripe and ICC Reader
- Certified Solution (Interac/UK CC/PCI/EMV)
- **iX Media™** helps retailers increase revenue and build brand loyalty with full-motion video promotions shown on a dispenser-integrated colour display. Customize the promotions for specific times, days, products or events. Even create and print custom coupons right at the dispenser! Easily managed with virtually any POS system, iX Media helps build customer loyalty, maximize branding campaigns and boost sales of higher-margin in-store products and premium fuels.
